Optoma NuForce BTR100 (Black)

Bluetooth Receiver

"Optoma's new BTR100 goes one step better, optionally delivering the stereo output optically into your hi-fi's TosLink socket for the very best audio quality." 'Tested Technology'

Free your music

The Optoma NuForce BTR100 Bluetooth receiver is the ideal way of listening to music from your Bluetooth-equipped device on your existing hi-fi. With a range of around 10m, the BTR100 is designed to let you hold your phone or portable device and select the track you want to listen to, without being tied by cables.

Quality components

Just as you'd expect from this top quality brand, the Optoma NuForce BTR100 uses high quality audiophile components. Combined with the high quality codecs this gives the BTR100 near CD quality sound - without wires!

aptX and AAC

aptX is the highest quality Bluetooth transmission system and means Bluetooth sounds more open and dynamic than usual. If you use an Apple device, then you can make the most of the AAC (Advanced Audio Coding) compatibility to ensure top quality sound that's a big improvement on MP3.

Remembers and stores up to eight devices

Unlike many other Bluetooth receivers, the NuForce BTR100 remembers and stores up to eight paired devices. This means you can connect up all the family's smartphones and tablets, without having the hassle of re-pairing them each time.

Digital and analogue outputs

Featuring both optical digital and 3.5mm analogue outputs, the BTR100 is compatible with a wide range of components. Use the optical digital output for the best sound with your AV receiver or digital amp.

Get the best sound from your with the Optoma BTR100.
